Chautauqua Here, Nov. 23, 24, 25, 26

Chautauqua will again visit Didsbury on Monday, Tuesday, Wednesday and Thursday, November 23rd, 24th, 25th and 26th, bringing with it loads of mirth, mystery, pep and optimism.

Six fine programs are being offered, giving a variety of plays and musical entertainments, lectures and novelties that will satisfy the tastes of all.

Make the Chautauqua your fall vacation. We all deserve a little recreation, and what could fill the bill better than this popular and wholesome entertainment!

Farm Home Burns.

The farm home of Mr. Chas. Rowell was totally destroyed by fire on Friday and no one being home at the time the contents were also burned. A bush fire had been burning on a five acre tract near by and was thought to be out. The heavy wind, however, again started the fire which jumped the fireguard, setting fire to the house. Although the fire got quite close the barn and out buildings escaped.

Hallowe'en Party At Public School

The kiddies at the public school again thoroughly enjoyed their annual Hallowe'en Party held last Friday and witches, ghosts and goblins had full control of the school during the afternoon.

There were between 50 and 60 who were dressed in costumes and many of them were particularly good. The prize winners were: Grades 1 to 4, Doreen Gillrie, "Black Cat"; Bobby Sharman, "Clown"; Grades 5 to 6; Winnie Adhead, "Death"; and Bob Madelche, "Witch". One of the prettiest costumes presented was the "Fairy" but was disqualified as not being in keeping with the occasion.

A snake dance through the High School by the kiddies in costume caused a lot of fun. A large number of parents and adult friends were present and the afternoon closed with a bounteous Hallowe'en lunch.

All Business Houses will be
CLOSED Wednesday Next.
REMEMBRANCE DAY.

LOCAL & GENERAL

Hale Goshco, Cliff Thaler and Andy Metzger are on the lookout for big game west of here.

Mr. J. J. Bowman, M.L.A., of Calgary was a business visitor here on Monday.

Mrs. H. Gooding was called to Youngstown last week to visit her father who is seriously ill.

Miss Evelyn Liesener has joined the Calgary Symphony Orchestra for the season.

St. Cyprin's A.Y.P.A. will meet tomorrow (Friday) evening at the home of Mrs. H. D. Bosker.

Mr. Ray Crosswell, of the Bank of Montreal, Edmonton, who is on his holidays, spent a few days here this week visiting friends.

Mr. E. Brooker and son, of Hanna is spending a few days here visiting with his brother, Mr. R. Brooker.

Mr. Wm. Wilson who has been visiting here for the past few weeks, left for his home at Armstrong, B.C. on Monday.

Messrs. F. Folkmann, H. Walters and Alex Bogner left last week for their homestead at Fort Assiniboia. John Allen says he is going up there later.

At the Opera House this evening (Thursday) "My Past," with Edie Daniels and Lewis Stone. Joe Sharp says this is a "damn good show."

The "Story of the Union Jack" will be told and illustrated with lantern slides in the United Church tomorrow (Friday) evening at 8 p.m. Admission free, collection.

The pastor, Rev. H. J. Wood will preach on the "Story of Naaman" on Friday evening November 6th at Bethel Evangelical Church, Westcott. On Sunday evening his sermon will be, "Heavenly Assurance."

The morning worship at Zion Evangelical Church on Sunday, November 8th, at 10:30 will be a Remembrance Day Service. In the evening at 7:30 the W.M.S. will hold their annual thank-offering service.

W. W. Gillrie reports that he had the championship carload of logs in the Calgary yards last week. The car comprised 27 select; 40 bacon and 25 butchers. The prices obtained for this car were: \$5.10 for select; \$4.60 for bacon and \$4.10 for butchers. It will be seen that the select brought 25 per cent more money than the butchers. While this car shows that a good grade of logs are being raised here, the above prices emphasize the importance of raising the better quality log, especially when prices are at the low level they are at present.

POPPY DAY.

In Flinders fields the poppies blow
Between the crosses row on row.

Saturday has been named as Poppy Day in this district and on that day all the citizens will be asked to wear a poppy in remembrance of the boys who lost their lives overseas during the Great War.

The Canadian Legion will have charge of the sale of poppies and have received a large supply.

These poppies have all been made by disabled returned men who are unable to compete in the ordinary labor market.

After expenses have been paid, the balance of the money received will be used to give relief to ex-servicemen.

"BUY A POPPY"

Canadian Legion Elects Officers

The election of officers for the local branch of the Canadian Legion was held at the regular meeting on Saturday night.

The secretary's report, which was presented, showed the Legion to have had an active and prosperous year, the financial statement showing a very substantial balance on hand.

The following officers were elected: President: Mr. J. H. Lowrie, 1st Vice-president: Mr. J. Robertson, 2nd Vice-president: Mr. H. Morgan, Sec.-Treas.: Mr. C. Mortimer, Sgt.-at-Arms: Mr. F. Kaufman, Pianist: Mr. Chas. Rowell, Executive Messrs. C. H. Adhead, F. Brown, E. Craig, H. C. Liesener and J. D. Thomas.

Bonus Means Much To Wheat Growers

The bonus on wheat, which is being paid by the Dominion Government brings quite a lot of additional money into the district. With the hauling of grain only just nicely started the effect of these payments are being felt. Up to the present time bonus checks amounting to over \$80,000 (80) have been issued by the local elevators.

While this bonus relief is very welcome to those who have wheat to sell, it is of no benefit to the wheat grower who suffers loss to his crops by the hail storm which passed through this district and who is in more need of relief than the man who has grain to sell. We understand that one of the wheat growers of the district wrote to the government pointing out this fact. He received an answer to the effect that the matter would be brought to the attention of the department and would be given serious consideration.

It is hoped that some way can be found to bring relief to these farmers as the bonus really works to their detriment, making them pay the bonus on the wheat they have to buy for feed and seed.

Coming Events

"Lost we forget"—Poppy Day, Saturday, November 7th.

Canadian Legion supper, concert and dance, Wednesday, Nov. 11th.

On Friday evening, November 13 a dance will be held in Hamman Hall, Bellamy Orchestra.

A concert under the auspices of St. Cyprin's W.A. will be held in the Opera House on Wednesday evening, November 18th. The program will be given by well-known Calgary artists. Admission: 25c. to everybody.

A National Disgrace

With the advent of the first few chilly nights this Fall, the newspapers once again begin the gruesome task of printing reports of fires with their records of tragic loss of life, terrible sufferings and enormous loss of valuable property, caused, in the vast majority of cases, through downright carelessness and disregard of the most obvious dictates of common sense.

In the first week following a drop in temperature the papers reported case after case of explosion, fire, and death following the improper use of kerosene in starting fires in stores. Yet people will persist in this highly dangerous practice.

Despite all the efforts of Government and municipal departments and officials, reinforced by those of insurance companies, the fire loss in Canada mounts steadily higher. Computed in dollars and cents alone Canadian fire losses in 1929 totalled over \$46,000,000. This does not take into account the loss of 237 lives, nor the expenses entailed for doctors, nurses, hospitals for a much larger number of persons severely burned. It does not include the enormous expense to which every urban community is put in maintaining elaborate and costly fire-fighting equipment, nor the excessive insurance premiums which the property is called upon to pay because the fire risk in Canada is so hazardous.

People today complain of depression, hard times and business losses, yet Canadians remain undisturbed over a condition, largely preventable, but which is levying a direct money toll upon them of millions of dollars a week. If because of hard times and consequent inability to pay rent or meet mortgage payments, an average of three families a day were thrown out of their homes, a vigorous protest against heartless landlords and mortgage companies would be heard throughout the land, yet, according to recent figures made public, an average of three families were made homeless by fire in Saskatchewan alone every day in 1929, and the figure is even higher for the first half of 1931.

The figures are positively startling. In this one Canadian Province, (Saskatchewan), between January 1, 1930, and July 31, 1931, no less than 1,679 dwellings, 579 stores, 610 barns, and hundreds of other buildings were destroyed by fire. And hardly a protest is heard!

And this terrible loss, which is being duplicated proportionately in all other Provinces, and which is going on at a time when the demand is being made to reduce legitimate expenditures all along the line, lower wages, eliminate all waste and extravagance, is largely preventable. This great loss, which, if saved, would more than provide for all necessary relief works throughout the Dominion, is the direct result of carelessness and reckless disregard of obviously dangerous conditions.

The work of education along lines of fire prevention must go on. It must be attempted on a scale hitherto unknown. It is gratifying to note that, in Saskatchewan at least, a well-organized campaign is being inaugurated among all school children, one designed to capture the imagination and assure the interest of all children.

But is fire prevention campaigns and propaganda sufficient in themselves? In the past they have not been. The question arises, therefore, whether the time has not come in Canada to have an official inquiry into every fire that takes place, ascertain the cause and fix the blame, and, coupled with this, to make it an offence under the law for any person to have a fire from other than natural causes beyond their control, such as lightning, and made liable to a fine and subject to the payment of damages for any resultant loss to other people's property?

If the tenant or owner of a house was liable to a fine if a fire occurs because of a dirty chimney, defective wiring, accumulated rubbish, or other preventable cause, and made to pay the costs of the fire department in extinguishing the blaze, and forced to make good any loss sustained by a neighbor because of his carelessness, then, possibly, a good many now very careless and thoughtless people would exercise more care.

And why, it may be asked, should the careless householder from a fire protection standpoint, be immune from the payment of penalties for his carelessness any more than the careless automobile driver, or industrialist who neglects to provide safeguards for his workmen?

The fire loss in Canada is a national disgrace, as well as constituting a huge annual national loss we can ill afford to suffer. It is time something effective, drastic if necessary, be done to not merely remedy but remove this evil.

Canada In England

A Prince Among Merchants

Dominion Took Prominent Part In Heir To British Throne Has Good Animal Exhibition Held At Bristol

A prominent part taken by Canada engaged either in a manufacture or in the annual exhibition at Bristol, the expert trade. Could Not Check the Summer Complaint

A Few Doses Did It

Mrs. E. Coulter, 218 11th Ave. E., Calgary, Alta., writes: "Last summer my youngest son was very bad with summer complaint, and everything he ate he would vomit, and he got so thin I became very much worried. I could not get the diarrhoea checked so I went to the drugist and he gave me a bottle of Dr. Fowler's Extract of Wild Strawberry and told me it would stop the trouble if anything would. After I had given him the very first dose I noticed the diarrhoea was being checked, and in was not long before he was well again."

Railway Accidents

One Hundred and Ninety-One Mishaps During the Month Of June.

There were 191 railway accidents during the month of June, a report issued by the Board of Railway Commissioners for Canada shows. Twenty-five persons were killed and 183 injured in these accidents, besides which there were 11 persons killed and 31 injured in 24 railway accidents at highway crossings.

Ontario led with 16 crossing accidents; Quebec had five. New Brunswick two, Nova Scotia one, and the rest of the provinces none, during the month. Of the 24 accidents, six occurred at protected and 18 at unprotected crossings. Twenty occurred during the day and four at night.

"THESE HARD TIMES"

"The hard times and scarcity of money makes it more important than ever to economize. One way I save on clothes is by renewing the collar of faded or out-of-style dresses, coats, stockings, and underwear. For dyeing or tinting, I always use Diamond Dyes. They are the most economical ones by far because they never fail to produce results that make you proud. Why, things look better than new when dyed with Diamond Dyes. They never spot, streak, or run. They go on smoothly and evenly, when in the hands of even a ten year old child. Another thing, Diamond Dyes never take the life out of cloth or leave it limp, some dyes do. They deserve to be called 'the world's finest dyes'."

S.B.G., Quebec.

The Safest Conveyance

Toronto Proves Accidents To Street Cars Are Rare

Although seventy-one were injured in a street car wreck at Windsor, Ontario, the fact remains that a street car is just about the safest place to be while on a public thoroughfare. Since taking over the Toronto railway in 1921, the Toronto Tramway Co. had collected, up to the end of 1930, more than 1,775,000,000 fares on its city system, and the number, together with fares on the coaches, etc., is now in excess of 2,000,000,000. Yet not one passenger has been killed while riding on a street car or bus. It is a fine record.

Help For Asthma. Neglect gives asthma a great advantage. The trouble, once it has secured a foothold, fastens its grip on the bronchial passages tenaciously. Dr. J. D. Kellogg's Asthma Remedy is daily benefiting cases of asthma of long standing. Years of suffering, however, might have been prevented had the remedy been used when the trouble was in its first stages. Do not neglect asthma, but use this preparation at once.

Frozen Strawberries

New Process For Packing Adopted By B.C. Growers

Frozen strawberries and other small fruit will be shipped from Vancouver Island in steadily increasing volumes following the adoption of a new process for packing, in the opinion of Captain F. Livesey, manager of the Saanich Fruit Growers Association, who expects that the plan will absorb a large part of this year's surplus. A company has been formed with a capital of \$75,000, and with the growers as chief stockholders, which expects to handle at least 20 tons of strawberries and loganberries this season.

Persian Balm—Invaluable to the whole family. To the mother, a flawless aid to loveliness. To the child, a soothing, healing balm. And to the father, a splendid hair fixative and cooling shaving lotion. Persian Balm tones and refreshes the skin. Makes hands delightfully soft and white. Indispensable to dainty women. A little gentle rubbing and it is absorbed by the tissues, making the skin truly rose-leaf in texture.

Where Man Falls

There are fifty million food victims starving in China while the granaries of Canada and the United States are bursting with millions of bushels of wheat for which there is no market. The people will likely go on dying and the wheat will continue to baffle the bins in which it is stored. Such is the world's system of transportation and distribution in emergencies.

Thirty-six tons of strawberries were carried by aeroplane from the Netherlands to London in May.

W. N. U. 3919

Save On Pensions

Decision Of Federal Government Will Assist Alberta

Savings at the rate of \$250,000 a year will be made to the Alberta provincial treasury by the decision of the Dominion Government to take over 75 per cent. of the old age pensions payments, advice of which has just been received from Ottawa.

The new arrangement will date from July last. It will involve a revision of the agreement between the provinces and Dominion, but this, it is stated by Premier Brownlee, will be only a formality and will be attended to at once.

The division of the responsibility for old age pensions, as between the two governments, has heretofore been on a fifty-fifty basis. Alberta's total budget for the purpose being \$1,000,000. On this a saving of 25 per cent. will now be made to the province.

Giant Airship Tested

The U.S.S. Akron Carried 113 Passengers On Trial Trip

The U.S.S. Akron has been taken upon her first flight and came down safely at Akron, Ohio, three hours and 47 minutes later.

The flight was the first test for the world's largest dirigible, built here for the United States navy, and the Akron went through it in a manner highly pleasing to navy officials.

The ship carried 113 men, the most ever carried in the air in the United States and believed by navy officials to be the largest passenger list of any airship in the world.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-voracious infant.

Up To The People

All the Government measures in the world cannot create prosperity, says the London Daily Express. They can break down barriers. They can clear the channels. But in the end the manufacturers, the worker, the wholesaler and the retailer must carry the responsibility on their shoulders. Leave government to the Government. They are quite adequate to the present emergency. As for the rest of us, let us get on with our jobs—and begin today.

And Now

Visiting Nurse: "And do your children use a toothbrush regularly?" Fond Parent: "Do they, mum? First thing when they get up in the morning, it's a race to see which one can get to the toothbrush first!"

When TEETHING makes HIM FUSSY

One of the most important things you can do to make a teething baby comfortable is to see that little bowels do their work of carrying off waste matter promptly and regularly. For this nothing is better than Castoria, a pure vegetable preparation specially made for babies and children. Castoria acts so gently you can give it to young infants to relieve colic. Yet it is always effective, for older children, too. Remember, Castoria contains no harsh drugs, no narcotics—is absolutely harmless. When your baby is fretful with teething or a food upset, give a cleansing dose of Castoria. Be sure you get genuine Castoria with the name: *Rosy Fletcher*

CASTORIA
CHILDREN CRY FOR IT

A Powerful Locomotive

The most powerful locomotive of its kind in cylinder type engine, left Smith Falls recently for Montreal, drawing a freight train of 96 cars of grain, a dynamometer and a van weighing 8,123 tons, the whole train being a mile in length. It arrived at its destination the same day when the grain was unloaded for shipment overseas.

Saskatchewan Sodium Sulphate Deposits Are Fast Becoming Of Major Importance To Province

One of the most interesting and important developments of mining in Western Canada recently, says the Manitoba Chamber of Mines, has been the activity in connection with the big sodium sulphate deposits of Saskatchewan. Once looked upon as "alkali sloughs" of no economic value, these Saskatchewan deposits are already becoming of major importance. Shipments in 1920 totalled 31,771 tons valued at \$293,817, compared with 5,078 tons valued at \$64,112 in 1919.

The Horseshoe Lake Mining Company at Ormiston, the principal producer, are shipping their sodium sulphate to the International Nickel Company's plant at Copper Cliff and to the sulphate-pulp mills. The Horseshoe Lake deposit is estimated to contain over 9,000,000 tons. Shipments average about three cars of sodium sulphate per day; and, in addition, besides other supplies, the operation requires the use of three carloads of coal per day, the cost being used to drive off the moisture content.

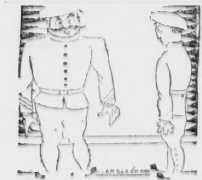

In 1925 imports of nitre cake used in nickel refining in Canada amounted to 80,000 tons. It would require 45,000 tons of the natural sodium sulphate from Saskatchewan to manufacture this quantity of nitre cake. In addition, in 1925, salt cake consumed by the pulp and paper mills totalled 44,822 tons. It appears probable, says same authority, that in 1931 much more of the pulp mill requirements will be supplied from Saskatchewan deposits.

The development of the "alkali sloughs" of Saskatchewan dates from the time of the war, when there was an exceptional demand for new sources of potash. Investigations carried on at that time demonstrated that there was an abundance of potash, but some of the investigators pursued the matter further and found that there was an abundance of sodium sulphate. The market for this product has been successfully developed in recent years, and the sales field is increasing. Sodium sulphate was first used as a medicine under the name of Glauber Salts. More recently demand has arisen for it in a number of industries. These include the making of fruit paper, the refining of nickel, the manufacture of window and plate glass, the dye and textile industries, tanning preparations, electro-chemistry and electro-plating and the explosives industry.

Some of the more important deposits of sodium sulphate listed in a review of the situation by the Manitoba Chamber of Mines are the Horseshoe Lake deposit, the Muckin Lake deposit and the Frederick Lake deposit. It is estimated by the Chamber of Mines that there are very large quantities of sodium sulphate available. Deposits lend themselves to ready measurement and those gauged to date total over 100,000,000 tons. Considering the other large number of known, but as yet unmeasured deposits, there is not much question but that Saskatchewan has at least 250,000,000 tons. Many fine individual occurrences running from 2,000,000 to 4,000,000 tons up to 10,000,000 and 15,000,000 tons are within easy and economic access.

Frozen Fish Sent Across Canada

The first regular shipments following the experimental shipment of quick frozen fish across Canada recently, comprising seven cars from Prince Rupert, passed through Winnipeg a few weeks ago over the Canadian National Railway enroute to the east for consumption in the United States and Eastern Canada.

"How can you have the nerve to look me in the face and tell me 'Well, sergeant, one can get used to anything.'—Gutierrez, Madrid."

W. N. M. 1910

King Crowned Annually

Ceremony Observed Every Year Before People In Uganda

The native king of Tene, Uganda, was recently crowned. But he is not a new king. The coronation is an annual event. The ceremony takes place on top of King's Hill, where King George Rukidi meets his chiefs and people. The king, who has visited England and been received at Buckingham Palace, is 6 feet tall. The King's coronation robes include a great cowrie shell headdress, with a long, silky white collar and monkey skin beard attached. On top of his enormous headdress is placed the actual crown, which is a small red cap. The most impressive part of the ceremony comes when the King walks alone to a small hut, before which, amid silence, he stands motionless and looks across his country for three minutes. After the ceremony the King changes into a European suit, and the Princess and the Queen Mother receive European visitors, while the King talks in English to his guests and a football match proceeds outside.

Trade Ship From Canada

Will Leave Halifax In January On Trip To West Indies

The West Indies were the first islands sighted by Columbus in his voyage of discovery in 1492. For years writers have made them the scene of tales of piracy and adventure and in more recent times of voodooism and romance.

When, however, the S.S. New Northland, sails from Halifax on January 8, 1921, the passengers will not be going in search of romance or buried treasure, but will endeavour to seek treasure of a more practical kind in the form of increased trade relations between the two countries. The ship will visit the smaller units of the British Empire which they will visit.

The Canadian Manufacturers' Association, the Canadian-West Indian League and the Clarke Steamship Company are co-operating in organizing the cruise to Bermuda, the British West Indies, British Guiana, the Bahamas and Cuba.

The lounge of the ship will be divided into booths for the exhibition of Canadian manufactured goods and other produce of this country. Further space for exhibits will be provided between decks and in the staterooms.

The cruise will occupy almost two months and between the time of leaving Halifax and the date of return, March 4, 12 ports will have been visited. At none of these ports will the party remain less than one day and at Kingston, Jamaica, the ship will be in the harbour for four days.

In addition to the organizations sponsoring the tour, support is being given the undertaking by Boards of Trade and Chambers of Commerce throughout Canada.

Butter Exports Grow

Heavy Increase In Amount Of Butter Exported Is Shown

That Canada is definitely on an export market basis in so far as butter is concerned is increasingly apparent with each succeeding issue of the market report of the Dominion Dairy and Cold Storage Branch. Exports of butter so far this season, since May 1, total 105,452 packages as compared with 3,068 packages for the corresponding period last year. Also evident is a swing of butter-fats from cheese to butter. Cheese exports last year, May 1 to August 29, 1921 totalled 349,100 boxes, as compared with 374,457 boxes for the same period last year.

Going out to hunt for butter is an ordinary experience in Trinidad, where the natives catch fat young "oil birds" and melt down a supply of butter.

Meat Packing Enjoys Rating As One Of Leading Manufacturing Industries Of The Dominion

Was Once Called "Shaddeck"

Captain Of That Name Discovered Grapefruit In Polynesian Islands (Grapefruit, which some "how down" columnist might refer to as a "juicy" topic of discussion, is certainly gaining a place in the world. Shipments of grapefruit to Great Britain and Europe were recently reported to be making strong gains each year, while on this continent it is said to be a strong rival of the orange at breakfast time.

As it happens the grapefruit has no more to do with, or is related to, the grape, than the man in the moon is to Linburger cheese. Its original name was the "shaddeck," after it was discovered by George Shaddeck in the Polynesian Islands. Because it grows in clusters, and for no other reason, it was forced to get along under its present title. Horticulturists having been trying in vain to christen it "pomelo."

Back in 1000, 1,000,150 boxes of the fruit were grown. In 20 years the number increased to 9,218,000 boxes. A native of the East Indies, it was brought to the West Indies, Florida and California, and has spread to Arizona and Texas. California has 9,000 acres of bearing trees. Arizona has 2,850 acres, Florida has 75,000 acres, while Texas the State of all berries, has 10,000 acres of bearing orchards. Each State has many trees, non-bearing, as yet.

Grapefruit indeed, it might be said, is getting more and more in the public eye.

Soldier Settler's Victory

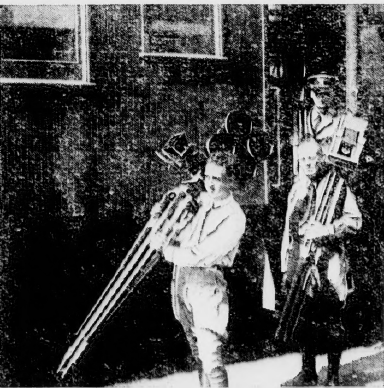

Awarded Alberta, Championship For Best Field Of Grain

Pence hath her victories no less renowned than war, as James Hazlett, of Balmoral near Red Deer, a former Canadian soldier in the Great War has demonstrated. He has been awarded the championship for the Province of Alberta for this year's best field of standing grain.

The prize-winning field was ten acres of Marquis wheat grown on breaking, and it was first entered in the Field Crop Competition of the Red Deer Agricultural Society, where it won first prize. It is expected to yield 60 bushel to the acre. This year Hazlett had 777 acres in crop of which 619 acres were sown to wheat.

The turn of a woman's head often turns a man's head.

WILL FILM THE AURORA BOREALIS

Photo—Canadian National Railway.

Three explorers and scientists, representing the United States Government, arrive at Churchill. Equipped with motion picture cameras possessing an exceptionally high rate of speed and with films sensitive to all the colors of the spectrum, they will film the Aurora Borealis, as a preliminary to the scientific investigations of Arctic atmosphere phenomenon which will be conducted next year by parties sent by all nations interested in Arctic exploration. In charge of the party is Capt. Flavel M. Williams (on steps). His companions are (left) A. Louis, assistant scientist and camera man, and (right) Robert Marshall, color expert. At Manitoba's ocean port they found an additional interest awaiting them in the loading of the first grain cargoes. They plan to photograph the events of this historic occasion in true colours.

Slaughtering and meat packing is one of the leading manufacturing industries of Canada. It ranks second in the list in order of value of production and is preceded by the pulp and paper industry only. On the basis of the value of materials used it comes first in the list. There were 76 slaughtering and meat packing plants in operation in Canada last year, which was an increase of two over 1920. Production last year, however, was lower than in 1920, which was the record year in the industry since the post-war boom.

The value of production of the slaughtering and meat packing industry in 1920 was \$104,299,959, while the value in 1921 was \$185,842,802. The capital invested in the industry in 1920 amounted to \$60,778,096, of which sum land, buildings and machinery accounted for \$2,788,585, materials, products and supplies on hand for \$15,442,178, and cash and accounts and bills receivable for \$12,538,223.

The number of animals slaughtered in Canadian plants in 1920 was 3,987,819, of these beeves numbered 627,135, sheep and lambs 758,170, hogs, 2,206,650 and calves, 305,881. The dressed weight of the animals slaughtered amounted to 724,024,410 pounds and the cost value to \$104,815,270. Decreases from the preceding year were shown in the number, weight and value of beeves and hogs slaughtered, while increases were shown in calves. Increases are reported in the number and weight of sheep and lambs slaughtered but there was a decrease in the cost value. Dressed meat purchased by the plants in 1920 in a fresh or partly cured state amounted to 70,538,746 pounds valued at \$11,011,881, and the poultry used showed a total of 6,240,939 pounds with a value of \$1,468,703.

The main centre of the slaughtering and meat packing industry in 1920 was in Ontario, where 24 establishments were operating. In the Province of Quebec the number was 17; British Columbia had nine; New Brunswick, eight; Manitoba and Alberta six each; Saskatchewan, three; Prince Edward Island, two, and Nova Scotia, one. The plants generally are of large capacity, only 10 of them in 1920 having a product valued at less than \$100,000. Establishments with a product valued at from \$100,000 to \$1,000,000 numbered 24, while those with a product valued at \$1,000,000 or over numbered 35.

The consumption per capita of beef and pork in the Dominion in 1920 is reported as being less than in 1920, while there was an increase in the consumption of mutton and lamb. The consumption of beef per capita last year is placed at 57.5 pounds, that of pork at 74.92 pounds, while that of mutton and lamb was 7.11 pounds. In the previous year the consumption of beef per capita was 68.13, pork 81.52 and mutton and lamb 7.03 pounds.

New Glass Is Flexible

A flexible glass has been invented in Europe. It is made largely from vegetable products. It has every appearance of genuine glass and does not look in the least like celluloid, yet it is said a sheet of it can be rolled up as easily as a piece of stiff paper, and it can be dropped or twisted or bent without injury.

The only absolute monarchies are the Empire of Abyssinia, the Kingdom of Spain and the Empire of Morocco.

War Again!

And again war looms on the horizon! While Europe is still in the bitter throes of paying for indulgence, Asia must try her hand. The human race seems as prone to war as it is prone to do evil. It does not seem possible that any nation today should dare to deliberately precipitate a war, but we were saying that in 1912. We imagined then that the world had become enlightened enough to settle its disputes by arbitration, but overnight we found ourselves in the midst of a world war.

There is yet hope that the League of Nations may at least effect a temporary peace, we doubt, however, about it being more than temporary. Japan is in Manchuria to stay, and we can expect her domination there to increase rather than decrease. A country no bigger than California, with a population of 80,000,000 people cannot afford to give up any territory that she may have a claim upon. Japan has everything to gain by a war of aggression, and nothing to lose. The only reason the configuration has been so long kindling, is because China is not in a position at present to drive out the invaders, but this affront will tend to unify the Chinese forces, and once unified, she will not wait for the League of Nations to remove the Japanese, she will undertake to clear the area herself. Then the war will be on, and once again we shall have enacted on a vast scale the horrible spectacle of human slaughter.

At the present stage of progress of civilization it is hard to understand how a Court of International Justice can be very effective without an International Police to enforce its decrees. As long as every nation is peaceably minded, a League without "teeth" is all that is needed, but when some nation becomes inoculated with the germ of war and starts out on a killing spree, it is evident that it takes more than words of kindly advice to restrain them.

The Canadian Farm Loan Act.

ARTICLE No. 1

This is the first of a series of articles which will appear in this paper on the Canadian Farm Loan Act, explaining the Act of which very little seems to be known to the Alberta farmers, and of arousing sufficient interest in it to induce the government to remedy any defects that might exist at the present time in the manner in which it is being administered.

Farming is our basic industry, and upon it depends the prosperity of all others. So far as financing the farmer is concerned, however, the methods in use here are expensive and antiquated, to say the least of them. What the farmer needs is an investment system for long-term loans for development and production, with small annual payments and at a rate of interest the industry can afford to pay. If he is to get the fullest return from his property it is essential that he should be able to place all necessary improvements on it.

In the United States three forms of credit are made available to the farmer at reasonable rates of interest. They may obtain long-term loans repayable in equal payments

LOCAL & GENERAL

"Caught Cheating," another of the great comedies by Geo. Sidney and Charlie Murray at the Opera House Monday and Thursday next. Thrills, love and laughter.

The Worthy Matron of the Eastern Star for Alberta, Mrs. Cullen, of Edmonton is expected to visit the local chapter on Friday evening. She will be accompanied by several members from Edmonton. Other visitors are also expected.

J. W. Phillipson has arranged a connection in Carstairs in his auctioneering business. Mr. Wesley Shantz who clerked for many years with Mr. J. G. Riddle and later with Mr. A. Boyce, will act as clerk and attend to Mr. Phillipson's interests.

The Oddfellows and Rebekahs will pay a fraternal visit to Alberta Lodge No. 1 tomorrow (Friday) evening. Any of the members wishing to attend, please communicate with Mr. Ed. Ford, so that arrangements may be made for transportation.

The members of Didsbury Rebekah Lodge were entertained to a turkey supper at the home of Mrs. W. J. McElroy on Tuesday. During the evening bridge was indulged in. Most clients being the prize winners. Those monthly socials are proving very popular with the members.

The hunting season on big game opened November 1st and Sunday saw a party of local hunters making tracks for the woods, that they might be ready first thing Monday morning. The party consisted of: Bill McFarquhar, Jim Cuthbert, Bert Fisher, Otto Mueller and Harvey Buckton, of Ghost Pine. We hope Bill gets his wildcat.

St. Cyprian's W.A. held a very enjoyable whist drive at the home of Mrs. J. H. Lowrie on Tuesday evening. Many novel innovations in the game were introduced during the evening, which added to the enjoyment. The prizewinners were: Ladies 1st, Mrs. Booker; 2nd, Mrs. Newton. Gentlemen 1st, Rev. R. Proulx; 2nd, Mr. H. Goehring. A delightful lunch was served at the close of the evening.

Mr. H. Lynch-Staunton, recently of the firm of A. Lannan & Co., barristers, Calgary, has opened a law office in the Leuzler Block here. Mr. Lynch-Staunton is a native-born Albertan and a nephew of Senator George Lynch-Staunton, K.C. of Hamilton, Ontario. He graduated in law from the University of Alberta in 1926, and has made a specialty of the study of farm finance with special application to conditions as they exist in this province.

of principal and interest over a term of from twenty to thirty-three years, with which to buy land or place permanent improvements on it; they may obtain intermediate loans, payable within five years, with which to purchase stock and equipment; and they may obtain short-term loans for a period of nine months, with which to pay operating expenses.

In 1927 the Dominion Parliament following the lead of the United States, passed the Canadian Farm Loan Act, but very little use appears to have been made of it so far. Our farmers are still struggling along with bank loans, which, owing to the nature of their business it is often impossible for them to pay when due, and for which they must pay a high rate of interest, and the old system of mortgage loans also at high rates of interest.

In further articles I intend to explain the workings of the Canadian Farm Loan Act with the object of showing how it could be of great benefit to the people of Alberta. I believe it deserves more publicity than it has received in the past. The amortization plan of repayment which it adopts saves the borrower an almost unbelievable amount in interest, and the intervention of the Farm Board should, as I will explain later, make the farm mortgage a much more liquid and popular form of investment than it is at present.

In my next article I will deal with the financial saving that accrues to the borrower under the Act, as compared with our present system.

H. Lynch-Staunton.

Christmas At Home

In half a minute Mrs. Cratchit entered—flushed, but smiling proudly—with the pudding, like a speckled cannon-ball, so hard and firm, blazing in half of half a quarter of ignited brandy, and bedight with Christmas holly stuck into the top.

Not very many words, but in those few words Charles Dickens seems to have gathered together all the reasons why every year Canadians from all over the

Dominion look towards England and the old-fashioned Christmas to reach even the remotest parts of the British Isles in time for the great English festival. They are, the Montclare for Glasgow, Belfast and Liverpool, December fifth, Dundee, December 10th, the same influence on steamship passenger officials as they make up their sailing lists.

This year the Canadian Pacific has arranged four sailings from Saint John, N.B., designed to real last-minute travelers.

The Rescuer to-morrow engaged in demolishing high buildings: "Arry! I 'ope you 'ave'n't bin buyin' cheap trousers!"—London Opinion.

WORLD HAPPENINGS BRIEFLY TOLD

Hon. George Hoadley says no more Hutterite immigration is to be allowed into the province of Alberta. H. G. Wells, noted author, advises the world should be declared bankrupt and its debts written off.

More than 3,000,000 pounds of freight were carried by French air lines last year.

The Graf Zeppelin returned to Friedrichshafen from their third cruise to Brazil, making the trip in 70 hours from Pernambuco.

Powdered or pulverized coal as fuel for cargo ships is being suggested as a means of relieving unemployment in the coal industry in Britain.

The disarmament committee of the League of Nations adopted a resolution designed to prepare for a possible one-year truce in armaments beginning November 1.

A consignment of more than a million Canadian apples soon will be on sale in automatic vending machines in Paris buildings as the first step in a big campaign to make France eat Canadian fruit.

Professor Albert Einstein has been ordered passage to the United States. The purpose of the professor's visit is to continue the studies he began last year at Mt. Wilson Observatory, in California.

The new home of the Canadian Club of New York, recently opened, is a self-contained unit on three floors of the new Waldorf Astoria. The new premises are specially designed and decorated to invest them with a distinctively Canadian character.

Thousands of citizens headed by civic, provincial and military officials of Fredericton, N.B., extended a greeting to the Earl of Bessborough, Governor-General of Canada, on the occasion of his Excellency's first official tour of the Maritime Provinces.

By Special Request

Little Betty's birthday was approaching a fact she was at no pains to conceal from her friends.

"Yes, darling!" said Aunt Jane. "The keeping it in mind and will send you a lovely present!"

"Thank, ever, much, auntie," said Betty, "and you will see that it's not something useful?"

"What! You can laugh when you are being executed?"

"Yes, I am thinking of the electricity bill you will have at the end of the month!"—Muskete, Vienna.

SASKATCHEWAN WEEED EXPERIMENTAL FARMS

(By S. H. Vigor, Saskatchewan Field Crops Commissioner)

The weed menace in Saskatchewan has become so acute, and definite experimental work on weed control has been so limited, that the Saskatchewan Government deemed it advisable to institute definite experimental and demonstrational work on the control of weeds for the benefit of the farmers of the province. Consequently in the spring of 1920 the Saskatchewan Department of Agriculture organized a provincial programme of research work for the study of weed control methods and problems. This work was placed under the direction of Dr. L. E. Kirk, of the University of Saskatchewan.

In 1920, land was secured at Drinkwater for the study of wild mustard, wild oats, stinkweed and Canada thistle. The years 1920 and 1921 were exceedingly dry and the results obtained were negligible, but the experimental work was thoroughly organized and much valuable experience was secured. In the spring of 1921 this work was transferred to the newly-organized Dominion Experimental sub-station at Regina.

In the spring of 1920, the Saskatchewan Government purchased a section and a half at Lockwood. This farm was heavily polluted with wild oats, Canada thistle, Russian thistle and couch grass, besides other weeds. The couch and quack grass had become introduced with broom grass seed and had taken possession of a large portion of the pasture. The soil was very fertile and the weeds drifted easily thus complicating the problem of weed control.

When the farm was secured in 1920, most of the seeding had been completed. Weeds and soil drifting did considerable damage, and a lot of the crop was cut for feed on account of wild oats and other noxious weeds. This was fed during the winter month to a carload of steers bought in the Moose Jaw stock yards.

Soil Drift Checked

The immediate problem was to prevent soil drifting and to check soil drifting by sowing fall rye on a large area. This rye has produced a good clean crop, and a lot of the soil drifting has been checked. Soil drifting in the Lockwood district was worse in the spring of 1921 than in 1920, but in the fall of the weed experimental farm. This may have been due to the kind of tillage, given the previous year, in which the one-way disc figured prominently.

Forage crops have been introduced on a small scale and include alfalfa, sweet clover, and western rye grass. Nice stands of these have been obtained and will provide forage and pasture for the livestock which is being gradually introduced.

In addition to the tillage methods being tried, different crops and crop rotations are being tested and it is expected a great deal of useful information will be secured.

In addition to the usual farm practices being tested, experiments have been undertaken in control of weeds by different chemicals. This involves two problems, one is the control of perennial weeds either growing in patches in a crop or growing on uncropped land, and second, the control of weeds other than perennials found in a growing crop. A good deal of progress has been made and it seems there is promise of controlling some weeds in a limited way by means of chemicals. However, a great deal more work will have to be done before definite statements can be made.

In all the experimental work being conducted the economic value of any practice is being kept in mind. It is safe to say that any weed can be exterminated. The problem however, is to eradicate or control weeds while at the same time making it profitable to farm.

Experiments cost money to carry on, and many of them may fail, but in failing give useful information. For example, it is valuable even to find out that some particular idea or practice will not give the results anticipated, and in discovering this, one may also discover many other things of value.

These valuable discoveries can then be made use of and applied under regular farm practice.

A careful set of cut records is being kept to enable those in charge of the station to determine which methods are most economical and can be tried into any farming plan.

Successful Field Day

In August of this year a field day was held attended by over 100 farmers who were shown over the fields on the farm. Explanations of the practices followed were given by Dr. Kirk. In September the Hon. W. A. C. Buckle, Minister of Agriculture, received the following letter indicating appreciation of the work accomplished by those in charge of the farm.

"Although living twenty miles west of there, I am quite interested in the Government demonstration farm at Lockwood. I judged

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME NEXT?—After Captain Jimmy and his Chinese friends were rescued from the desert island by the freighter "Montreal," they sailed a Chinese junk, and ever since then he had hoped for a chance to clear up the Chinese lands.

The thought suddenly occurred in Jimmy's head, as he sat in the room with the Chinese friends. "What if I could get a chance to clear up the Chinese lands?" he thought. "I would have expected to turn warrior. It was not until a long time later that I learned that the Pirates had broken up China's feudal house on the river and had the district waste, and ever since then he had hoped for a chance to clear up the Chinese lands."

He was amazed. Jimmy, of all people, was the last man on earth that I would have expected to turn warrior. It was not until a long time later that I learned that the Pirates had broken up China's feudal house on the river and had the district waste, and ever since then he had hoped for a chance to clear up the Chinese lands."

It was not until a long time later that I learned that the Pirates had broken up China's feudal house on the river and had the district waste, and ever since then he had hoped for a chance to clear up the Chinese lands."

He was amazed. Jimmy, of all people, was the last man on earth that I would have expected to turn warrior. It was not until a long time later that I learned that the Pirates had broken up China's feudal house on the river and had the district waste, and ever since then he had hoped for a chance to clear up the Chinese lands."

Enslaving a Nation

Heavy Taxation in England May Defeat Its Own Purpose

A reading of the provisions of Chancellor Philip Snowden's scheme to balance the British budget leaves no doubt that Great Britain stands at the crossroads. Single men who earn as little as \$10 a week and married men who earn as little as \$15 a week will have to pay income taxes. The wealthy will have 50 per cent. of their incomes taken from them. A single man earning \$1,500 will have to pay more than \$325 to the Government.

We do not think any argument is needed to establish the fact that such taxation is self-defeating. It can be continued only at the cost of a permanently lowered standard of living, the snuffing out of initiative and the dissipation of the accumulated capital which alone can provide private industry with the means to keep its plant abreast of the times. Chancellor Snowden's proposals are heroic as the charge at Balaklava was heroic and just as futile. The price of such taxation, if persisted in, must be the debasement of the nation and industrial and commercial decline. The result is already apparent under present exactions. The new and higher rates must hasten the process.—Chicago Tribune.

Among the furs considered the most durable are otter, beaver, seal, leopard and mink.

Some Interesting Facts

From Eighty-four Poultry Farmers May Draw Moral

Take 84 pounds of grain plus 1 hen and you have 12 dozen eggs. With grain selling at 1 1/2 cents per pound, and eggs selling at 20 cents per dozen, this means a value of \$5.60 for the grain, or a profit of \$2.32 over the cost of the feed, or selling grain at a price of \$4.28 per cwt. Here are some more facts: The hen which lays 25 eggs means a loss of 64 cents over the cost of feed for one year; the hen which lays 50 eggs means a loss of 1 cent; the hen which lays 100 eggs means a profit of \$1.25; the hen which lays 150 eggs means a profit of \$2.45; while the hen which lays 200 eggs brings a profit of \$3.74. Moral—Watch the danger line and get rid of the brooders.

Remembrance Day Activities

The armistice will again be celebrated by the Canadian Legion with a supper, concert and dance on Remembrance Day next Wednesday.

At 6 p.m. supper will be served in the basement of the Knox United Church.

At 8.30 p.m. members of the Legion will present at the Opera House, "Leave" (France, 1917) a play in two acts. This will be of particular interest, as all members of the cast were in the trenches during 1917.

At 10 p.m. a dance will be held, the Bellamy Orchestra supplying the music.

All who attended this celebration last year will remember the enjoyable time that was had, and no doubt, on this occasion it will receive the same generous support.

Melvin Notes

Chris Foss was a business visitor to Calgary on Monday.

Mr. and Mrs. Irwin Klein spent Sunday with Mr. and Mrs. E. Krebs.

Mr. and Mrs. Findlay, visited Mr. and Mrs. P. Johnston, Sunday.

Mr. and Mrs. A. Krebs, were in Calgary on Saturday.

A number from our district motored to Calgary Saturday evening to see the "Dumb Bells".

Mr. and Mrs. A. Krebs, spent Sunday with Mr. and Mrs. A. F. Cowitz.

Mr. & Mrs. Everard Clark, spent Sunday with Mr. and Mrs. John Clark.

Mrs. Johnston, Rimold and Ruth, are visiting Mr. and Mrs. Ed. Vetter, at Three Hills.

Our district is scarce of men since the hunting season opened. We wish them luck with their "dear".

Westcott Notes.

The October meeting of the W.I. was held at the home of Mrs. R. A. McFarlane last Thursday. The meeting opened with the singing of the Canadian boat song. There were fifteen members, and six visitors present. All were very happy over the success of the play and sale of work, which realized the sum of \$86.00. A paper was given on the League of Nations. The day being recognized as Canadian Authors' Day, the remainder of the afternoon was spent with selections from Canadian writers, which were arranged by Mrs. B. Webster, who also gave the paper. The ladies enjoyed a very profitable afternoon, and lunch was served at the close of the meeting.

Mountain View Notes

Mrs. B. A. Atkinson and Miss D. Brown were visitors to Olds on Saturday.

Mr. J. Nelson, of the Hammer district was a business visitor to Mountain View on Saturday.

Mrs. E. Blain, Mr. and Mrs. H. Roberts and Mr. and Mrs. B. A. Atkinson were recent visitors to Calgary.

The annual fall bazaar of the W.I. which was to be held Friday evening has been postponed until the following Friday, November 13th when the usual whist drive and dance will be held.

Several farmers have recently made trips to the coal mine at Twinning, near Three Hills. Coal is being purchased at \$3.00 per ton and the alien report there is ample and comfortable accommodation for 12 teams.

The pupils of Mona School enjoyed a Halloween party on Friday. Fortune telling, games and a songbook lunch were part of the afternoon's proceedings. Mac Cook, one of the pupils furnished picturesque hats and numerous decorations for the occasion and the school was tastefully and suitably decorated with the proverbial black cats, etc. Doubtless, some of the adjoining schools enjoyed similar festivities.

Burnside Notes

Lone Pine W.I. meet Thursday next at the home of Miss W. Spraggs.

Mrs. J. Malloch is laid up with a very painful attack of lumbago.

Miss Grace McCulloch is much improved since her recent illness.

Mr. Ralph Long spent the week-end with Mr. and Mrs. Joe Clark.

Mr. Dick Metz was home from the bush for the week-end.

Mr. Sam McAlister spent Sunday at Mr. Noah Eckel's.

Mrs. Jim McCulloch who has been laid up with blood-poisoning in her hand is much improved.

Mr. Jack Smith and Mr. Nesbitt, of Three Hills were Sunday callers at Mr. Noah Eckel's.

We have discovered that we have some very clever window decorators in the district. Halloween brings out all kinds of artistic talent.

Mr. and Mrs. Lawrence Swab and family are here from Saskatchewan. They are visiting Mrs. Swab's mother, Mrs. C. Bitter.

Threshing is almost done in this district. Some good yields were reported, but this part of the country got hail and had little or no crop.

Lone Pine W.I. held a very enjoyable social evening and whist drive on Halloween. Prizewinners were: Ladies 1st, C. Morasch; Gents, 1st, A. E. Thompson. Consolators: Annetta Sheils and Horace Sheils.
